Cilacap, Jawa Tengah

Informatics Engineering graduate from Politeknik Negeri Cilacap who completed the final examination and graduation process in 2026, with internship experience as a Full Stack Web Developer at PT Sucofindo and hands-on application development experience through the MBKM Dicoding x DBS Foundation program. Experienced in full-stack web application development, including frontend and backend development, business logic, RESTful APIs, relational databases, debugging, testing, and frontend-backend integration using Laravel, PHP, CodeIgniter 4, React.js, Express.js, MySQL, and PostgreSQL. Strong problem-solving and analytical thinking skills with experience collaborating in software development teams. Seeking to contribute as a Full Stack Developer in developing and enhancing web applications.

EDUCATION

Politeknik Negeri Cilacap

Aug 2023 - Jul 2026

Diploma 3 Teknik Informatika

- Yudisium: July 2026 | Official graduation documents pending issuance
- GPA through Semester 5: 3.77/4.00 (98 credits)
- Semester 6: MBKM Dicoding x DBS Foundation — 20 credits

EXPERIENCE

Full-Stack Web Developer Intern - Cilacap, Jawa Tengah

Aug 2025 - Dec 2025

PT. Sucofindo Cilacap

- Developed and enhanced two internal web applications, LifeSync and TJSL, using Laravel, CodeIgniter 4, MySQL, JavaScript, Tailwind CSS, and Bootstrap to support internal operational processes and corporate social responsibility program transparency.
- Developed 25+ RESTful API endpoints with authentication, CRUD functionality, business logic, and database integration using MVC architecture.
- Designed and implemented 10+ relational MySQL tables to support data management across two internal applications.
- Designed 39+ high-fidelity UI/UX screens in Figma and translated them into responsive web interfaces across two internal applications.
- Performed application testing and troubleshooting to identify issues and support reliable application functionality.
- Collaborated with a 3-member development team throughout application development, testing, and deployment.
- Prepared technical documentation and supported operational data management involving 1,000+ records using Microsoft Excel and Microsoft Word.

Full-Stack Web Developer

Feb 2026 - Jun 2026

MBKM Dicoding x DBS Foundation 2026

- Developed WatchU, a collaborative web platform as part of a 6-member cross-disciplinary team consisting of Full-Stack Web Developer, AI Engineer, and Data Scientist participants.
- Developed 15+ RESTful API endpoints using Express.js and PostgreSQL with JWT Authentication to support authentication, movie management, reviews, ratings, and sentiment analysis.
- Implemented backend functionality, database integration, and API services to support frontend-backend communication.
- Collaborated throughout the development process using Git/ GitHub, including feature implementation, testing, debugging, and integration.

IT Support Intern - Banyumas, Jawa Tengah

Mar 2022 - May 2022

Hiba Comp Sampang

- Assisted with basic web development using HTML, CSS, and PHP through hands-on implementation and technical guidance.
- Configured and tested 5+ MikroTik network devices and supported local network connectivity troubleshooting.
- Assisted with daily administrative and operational tasks and collaborated with the team to resolve technical requirements.

ORGANIZATION

Web Developer

Oct 2024 - Jul 2025

UKM PROTIC Politeknik Negeri Cilacap

- Collaborated with 11 division members to develop web applications using modern web technologies.
- Contributed to system design, feature implementation, application testing, and deployment across multiple internal projects.
- Supported programming workshops and technology-related activities as an organizing committee member.

Graphic Design Staff — Communication & Information Department

Oct 2023 - Jun 2025

BEM Politeknik Negeri Cilacap

- Created 80+ digital publication materials for 10+ organizational events while collaborating with cross-functional teams.

TECHNICAL SKILLS & CERTIFICATIONS

- **Programming Languages:** PHP, JavaScript, TypeScript
- **Frontend:** React.js, HTML, CSS, Tailwind CSS, Bootstrap
- **Api & Integration:** RESTful API, JWT Authentication, API Integration
- **Backend:** Laravel, CodeIgniter 4, Express.js, Node.js, MVC Architecture
- **Database:** MySQL, PostgreSQL, Relational Database
- **Development Practices:** Git, GitHub, Debugging, Testing, Version Control
- **Tools:** Postman, Visual Studio Code, Figma
- **Junior Mobile Programmer – BNSP**  (2025): Passed the national competency assessment in mobile application development using Flutter under BNSP standards.
- **Dicoding x DBS Foundation — Full-Stack Web Developer MBKM 2026**  (2026): Completed the MBKM industry-based learning program focused on full-stack web development.
- **Advanced Admin Panel Development with Laravel Filament**  (2025): Completed training in admin dashboard development using Laravel Filament.
- **Oracle Academy Database Foundations**  (2024): Completed training in database design, SQL, and relational database concepts.
